Scheduled work prices are locked in for you until May 2012. For a small business with weekly updates, three hours a week can be reasonable, depending on level of activity. Work can be done remotely or on-site.

Emergency updates are \$150/hour. ("I need this done right now!") This is still subject to working around my scheduled clients. If you foresee a need for immediate updates, you may want to put me on schedule. Payment is due for scheduled hours at the end of the week or month whether you have used them or not.

Why me? The Internet isn't closed evenings and weekends and neither am I. I'm Enid local. I'm professional. I'll get it done, and I'll get it done right. See my resume. Reference letters are available on request.

Yes, I also create sites from scratch. A two-hour initial consultation for \$120 (Enid local or Skype) includes whatever work I can get done for you and suggestions I can make in that time for an existing site, or if you are wanting a site built, 2 hours off total design and development price should you choose to hire me for a new site project. New site project estimates vary according to size and what is needed for the site.
